

EVOLUTIS & HOLOLENS 2

YOUR FIRST STEPS TOWARDS
THE FUTURE OF SURGERY
SIGNED BY MICROSOFT

MICROSOFT HOLOLENS 2

FACILITATE SURGEON'S DECISION-MAKING
AND IMPROVE THE ACCURACY OF HIS GESTURES

HoloLens 2 is an autonomous, ergonomic and mobile holographic device designed to enhance the accuracy and the performance of the surgical gestures.

- The headset is fitted with cameras, sensors, microphones and headphones to improve the capacity of analysis and the accuracy of the surgical procedure. It enables to access patient data and to remote communication functions.
- Move freely with the HoloLens 2 headset, a real virtually controlled computer allowing the manipulation of holographic tools.
- Benefit from the reliability, security and adaptability of the Cloud, and from the AI (Artificial Intelligence) of Microsoft and all of its online applications.

Manipulate the patient's joint in 3D and confirm your surgical procedure for optimized positioning of the prosthesis.

Consult the patient data at any time.

Integrate virtual objects into the surgical field such as patient imaging or surgical technique steps.

Connect in real time with peers around the world or with your team for support, teaching or sharing.

HEAD-OP® APP FROM EVOLUTIS

COMMUNICATE REMOTELY WITH EXPERTS, CONSULT THE PATIENT DATA AND MANIPULATE 3D OBJECTS WITHIN THE OPERATING ROOM OR FROM YOUR OFFICE, IN MIXED REALITY ENVIRONMENT

HEADSET
